

MediaShout Bridge

\$129

MediaShout Bridge is a new PowerPoint Add-In that brings the convenience of lyric and Bible databases to the familiar tools found in PowerPoint. Creating your Sunday services in PowerPoint has never been easier. MediaShout 5 installation not required. Licensed for installation on one computer.

FEATURES & BENEFITS:

- **Lyric Library** - MediaShout Bridge includes a lyric library, making slide creation a breeze. Simply choose the song you want, apply a background, and you're done. Don't have the song in your database? No problem, MediaShout Bridge integrates seamlessly with CCLI's SongSelect, giving you access to lyrics from over 100,000 worship songs.
- **Bible Integration** - MediaShout Bridge also includes 65 translations of the Bible. You don't have to look up a passage and type it in ever again, just use the integrated Bible database. All 65 translations are free, so no matter what version your church uses, you'll find it in MediaShout Bridge. Just like with lyrics, you'll choose the verses you want, pick a background, and you're done!
- **Simple Text Creation** - Creating PowerPoint announcements, sermon points or other text slides is a snap. Copy and paste from your source, easily separate into individual slides, apply your background and that's it. If your pastor drops their sermon notes on your desk 10 minutes before the service starts, this is the feature for you.
- **MediaShout Export** - MediaShout 5 users can export their presentations from Bridge straight into MediaShout. The export button creates a MediaShout script file, and you can easily import that straight into MediaShout 5.

SYSTEM REQUIREMENTS:

- Requires Windows OS
- PowerPoint 2007, 2010 or 2013
- Single computer license
- MediaShout installation NOT required
