

MediaShout 5 Upgrade

\$219

MediaShout combines worship presentation tools with the ability to simultaneously edit and play your presentation without interrupting your audience. Designed for volunteers and professionals alike, MediaShout makes it easy to create beautiful presentations and deliver your message to any size audience.

If you have purchased additional licenses or site license for your current version, those licenses will automatically carry forward with you into MediaShout 5. All you need is one upgrade for only \$219 to upgrade all of your MediaShout systems.

NEW FEATURES:

- **Multiple Objects Per Slide** - Sermon notes and announcements just got easier. Include multiple text boxes, images, videos and more on any slide, and assign each object it's own transition.
- **New User Interface** - The new user interface is redesigned and improved, making it easier for volunteers and pros to create and run your presentations.
- **Announcement Deck** - With this powerful new tool, MediaShout will display just the announcements you want in a given week. Great for churches with recurring announcements and/or multiple services.
- **Stage Mirroring** - The Stage Display got an overhaul and now you have more control over what your team sees on the stage monitor.
- **New Video Engine** - With the overhauled video engine, performance is dramatically improved over our previous versions. Videos fire quickly and seamlessly, and we've added dozens of beautiful transitions for both slides and objects.

INCLUDES:

- 3 Computer License
- 65 Versions of the Bible
- More the \$900 Worth of Free Media
- Lyrics to 600 Classic Worship Songs
